

Langkawi Canopy Adventures

Description:

The setting is at Gunung Raya, Langkawi's tallest mountain and home to some 400 tree species and an array of wildlife including the flying lemur, mouse deer, lorries, wild boar, civet cat and at least 40 species of snakes. A guided trek up the 890m tall granitoid mountain is a popular rough-it-out option, though a different sort of adrenaline rush can be found just a few hundred meters into the primary rainforest.

Zip lines, rope course, controlled descents and various other activities await you, with friendly staff. Fancy crossing a real jungle bridge with rushing waters far below? Kayaking through mangroves? We do it all.

We're famous for building character, building teams and most importantly building a great foundation to your Langkawi visit. We take individuals as well as groups but be aware some activities require a number of people booked and so may not be available certain days. To avoid disappointment please book in advance from this site! Click the "Request a Booking" button on the right hand menu.

We can pick you up from wherever you're staying on the island - and despite the adrenaline bring you home in one piece!

We look forward to seeing you.
